## EDUCATION

### Pan-Atlantic University

*Bachelor of Science in Computer Science*

Lagos, Nigeria

Oct. 2021 – July 2025

### Rainbow College

*Secondary Education*

Lagos, Nigeria

Sept. 2015 – May 2021

## EXPERIENCE

### Freelance Software Developer

*Remote*

February 2025 – Present

*Self-employed, Lagos*

- Developed Shopify and headless e-commerce stores for 10+ clients across fashion, beauty and tech using Next.js and TypeScript, including multi-currency selling with Shopify Markets and weight-based shipping
- Built websites for 10+ businesses in entertainment, cybersecurity, energy consulting and logistics, from requirements to launch, focusing on performance, mobile responsiveness and SEO.
- Managed client relationships directly, including scoping, timelines, revisions and handover.
- Key project – AfroRevive**, event ticketing platform for a client (in development)
  - \* Frontend developer on a platform serving three user roles: organisers, attendees and admins, each with a dedicated interface and role-based access.
  - \* Building the organiser dashboard for creating events, setting ticket types and pricing, and tracking sales and attendees in real time.
  - \* Developing the attendee flow for discovering events, purchasing tickets through Flutterwave checkout, and accessing QR-code tickets.
  - \* Implementing responsive, mobile-first UIs in Next.js and TypeScript, integrating with backend APIs for events, payments and ticketing.

### E-commerce Developer and Website Manager

*Street Souk*

October 2024 – June. 2026

*Lagos, Nigeria*

- Creating forms for both Abuja and Lagos editions using Webflow to make it easy for users to fill out and submit
- Handled creative direction for product photography
- Handling all form submissions to ensure data is collected accurately and reaches the right people
- Developed and maintained the online store using Shopify's Storefront API via GraphQL and Next.js, enhancing performance.

### Frontend Developer and E-commerce Specialist

*House Of Bluecherry*

September. 2025 – March. 2026

*Frankfurt, Germany*

- Developed a headless e-commerce platform integrating Sanity CMS with Shopify's Storefront API via GraphQL and Next.js, delivering a high-performance retail experience.
- Configured Shopify store infrastructure, including product catalogs, inventory systems, and collection hierarchies
- Delivered technical training on e-commerce development practices and platforms to student

### Inventory Manager and Full stack Engineer

*If You Leave Me I Will Be Scared (IYLMIBS)*

October 2024 – Present

*Lagos, Nigeria*

- Managed the online store and order fulfillment process, coordinating with manufacturers to ensure timely delivery to customers.
- Designed and developed responsive, user-friendly websites for clients, tailored to their brand and business needs.
- Built a robust web application using Next.js and Nest.js, providing full control over functionality and user experience.
- Collaborated with a multimedia team to integrate web solutions into broader media strategies for clients.

### Front-end Developer

*Peak Harmony*

July 2024 – November 2024

*London, United Kingdom*

- Designing and developed a responsive e-commerce user interface using React and Tailwind CSS, enhancing user experience and accessibility
- Leading a cross-functional team to integrate API functionality into the front end, ensuring seamless communication between the backend and UI for optimal performance.

## Full stack Developer

July 2023 – Oct. 2023

*System Specs Deelaa*

*Lagos, Nigeria*

- Worked on an e-commerce project using Firebase and React
- Learnt the fundamentals of PHP, Docker, and MySQL
- Worked on a full stack e-commerce project using MySQL, React, and Express as its Backend server

## Junior Teacher

July. 2022 – Oct. 2022

*New Horizon Lekki*

*Lagos, Nigeria*

- Responsible for teaching Microsoft packages such as Excel, PowerPoint, Word, and Access.
- Responsible for teaching junior-level Python
- Responsible for assisting the receptionist in answering queries

## PERSONAL PROJECTS

---

### ISESEN (E-commerce project ) | *React, Node, Express, MySQL*

Aug. 2023 – Jan. 2024

- Developed a full-stack web application using Node serving a REST API with React as the frontend
- Implemented Google OAuth as a means for users to log into the system.
- Integrated Paystack to allow users to easily and securely pay for any products they purchase.
- Integrated Nodemailer as a tool to handle email services, such as resetting users' passwords.

### SOZIFY (Social Media project) | *React Native, Node, Express, Firebase*

March 2024 – July 2024

- Developing a mobile application for music lovers. Share songs, post about favorites, and chat with friends. Cool chat box feature to send fav songs/lyrics. Follow friends to discover new music
- Implemented Spotify OAuth 2.0 to retrieve user information and provide personalized experience.
- Implemented Firestore to retrieve and display posts created by users.

### Naija Trust (Review-Based Application) | *React, Nest.js, PostgreSQL*

April 2025 – Present

- Building a trust platform connecting Nigerian SMEs with customers through authenticated business reviews, addressing the trust gap in local e-commerce
- Engineered multi-layer authentication system to verify reviewer identity and prevent fraudulent reviews, ensuring platform integrity
- Architected mobile-first Progressive Web App (PWA) with optimized caching strategies to minimize latency in low-bandwidth environments
